

ANURANJKRISHNA K

Full Stack Developer (Python / Django / React.js)

+91 9497419238 | anuranjkrishnakadankodan@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 2 years of experience designing and shipping production web applications using Python, Django, Django REST Framework, and React.js. Built and deployed 3 full-stack applications end-to-end, including secure REST APIs, JWT authentication, and role-based access control, with cloud deployment on Render, Netlify, and Docker. Also builds AI-integrated tools using the Google Gemini API and leverages Claude AI for code review and debugging. Looking to bring hands-on API design and deployment experience to a product engineering team.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+)

Frontend / Backend: React.js, Redux, HTML5, CSS3, Bootstrap | Django, Django REST Framework, Flask, REST API Design

Databases: PostgreSQL, MySQL, SQLite, Redis, SQL

Auth & Security: JWT Authentication, OAuth basics, RBAC, CRUD Operations

Tools & DevOps: Git, GitHub, Docker, Postman, Render, Netlify, VS Code, CI/CD basics | AI: Google Gemini API, Claude AI (Anthropic), PDFPlumber, Pandas

PROFESSIONAL EXPERIENCE

Software Developer – Full Stack | METXR Studios Pvt Ltd

May 2024 - June 2026

- Engineered and shipped full-stack web applications end-to-end using Python, Django, React.js, JavaScript, HTML5, CSS3, and Bootstrap, from design through production deployment.
- Designed and integrated RESTful APIs enabling secure communication between the React frontend and Django backend services across multiple production releases.
- Built responsive, cross-browser UIs with a focus on performance and usability, contributing to measurable improvements in page load times.
- Implemented JWT authentication and role-based authorization (RBAC); managed MySQL databases including schema design, CRUD operations, indexing, and query optimization to reduce API response times.
- Collaborated cross-functionally using Git/GitHub, code reviews, and Agile practices to ship multiple production releases on schedule.
- Owned debugging, testing, and deployment across production releases, diagnosing performance bottlenecks and improving application stability.
- Leveraged AI tools (Claude AI) for code review, debugging, and quality assurance across production releases.

Python Full Stack Developer Intern | Inmakes Infotech, Kochi

January 2024 - April 2024

- Developed responsive full-stack web applications using Django, React.js, HTML5, CSS3, Bootstrap, and JavaScript.
- Built and integrated RESTful APIs to connect frontend applications with backend services; designed schemas and implemented CRUD operations using MySQL and SQLite.
- Assisted in building authentication modules and core backend business logic; contributed to debugging and iterative feature enhancement.

PROJECTS

Let's Connect — Full-Stack Social Media Platform github.com/anuranjkrishna/letsconnect

- Built and deployed a full-stack social platform (Django REST Framework, JWT, React.js) with authentication, posts, likes, comments, follow/unfollow, profiles, notifications, and real-time chat; backend on Render, frontend on Netlify.

AI Resume Analyzer [AI-Powered Career Tool](#)

- Built and deployed an AI-powered resume analyzer (Python, Flask, PDFPlumber, SQLite) that scores resumes against job descriptions using ATS scoring and skill-gap analysis.
- Integrated Google Gemini AI for resume feedback, personalized interview questions, and career recommendations.

E-commerce Platform [Full-Stack Shopping Platform with Payment Integration](#)

- Built a full-stack e-commerce platform (Django REST Framework, React.js, PostgreSQL) with product catalog, shopping cart, JWT authentication, and Razorpay payment gateway integration (COD + online payments).

EDUCATION

MCA — Manipal University Jaipur (Online), 2026–Present | Bachelor's Degree — Kannur University | PG Diploma in Cooperation — ICM Kannur
